Comment Instructions—Proposed Warehouse Development

Of particular interest to those who live in the City of Puyallup is the proposed development of a 187-acre site for warehouses. The site is located just east of the Shaw Road extension bridge. The applicant's preliminary site plan shows over 3 million square feet of industrial (warehouse distribution and freight movement) space in seven separate warehouses. Please see the site plan in the accompanying Revised Notice of Application.

Because the proposed warehouse development is not within city limits, the City of Puyallup does not have jurisdiction over the proposed project. Rather, Pierce County is the jurisdictional and permitting authority. Thus, if you would like to submit comments about the proposed project, you should submit comments to Pierce County.

The initial comment deadline is **July 18, 2016**, although according to Pierce County code, Pierce County is able to accept public comment at any time prior to the decision on the project permit. According to the Revised Notice of Application, you can provide comment as follows:

Send written comment, with application name and number to:

Planning and Land Services
Current Planning, Suite 175
2401 South 35th Street
Tacoma, WA 98409

You may request notice of any applicable public meeting, hearing, or copy of the final decision in your comment letter.

Alternatively, although the Revised Notice of Application for this project indicates a mailing address for written comments, comments may also be submitted via e-mail to the project manager, Marcia Lucero, mlucero@co.pierce.wa.us. For questions, please contact Ms. Lucero via her e-mail address or by calling (253) 798-2789.

More generally, Pierce County's online permit system offers a way for those interested in this project to receive status updates via e-mail. Those who sign up will automatically be notified when there has been a review, inspection or change in the application or permit status. To sign up, navigate to co.pierce.wa.us, choose "E-Services/Online Tools" and then select "Online Permits" below the "Property" header.
